Poor app performance can ruin the user experience and destroy your app's reputation. If it ever responds slowly, shows choppy animations, freezes, crashes, or consumes a lot of power, your users will notice. To avoid these performance problems, use the Android Profiler to measure your app's memory, CPU, and network usage.

Documentation | Android Developers

A free, online, self-paced series of courses for aspiring Android developers with no prior programming experience. In the first course, you build your first Android app. The later courses in the series teach you how to add more functionality to your app, connect to the internet, set up databases, and store data in your app.
