About. The OWASP Java™ and JVM Technology Knowledge Base is the clearing house for all information related to building secure web/distributed applications and services based on Java and JVM technologies.

Category:Java - OWASP

Oracle acquired Sun Microsystems in 2010, and since that time Oracle's hardware and software engineers have worked side-by-side to build fully integrated systems and optimized solutions designed to achieve performance levels that are unmatched in the industry. Early examples include the Oracle Exadata Database Machine X2-8, and the first Oracle Exalogic Elastic Cloud, both introduced in late 2010.

The Java Class Library (JCL) is a set of dynamically loadable libraries that Java applications can call at run time. Because the Java Platform is not dependent on a specific operating system, applications cannot rely on any of the platform-native libraries. Instead, the Java Platform provides a comprehensive set of standard class libraries, containing the functions common to modern operating ...

This book is a basic introduction to Object Oriented Programming Using C#.

Beginning C# Object Oriented Programming

Free Java implementations are software projects that implement Oracle's Java technologies and are distributed under free software licences, thus making them free software. Sun released most of its Java source code as free software in May 2007, so it can now almost be considered a free Java implementation.

Free Java implementations - Wikipedia

Just like the title says...I know you can goto page numbers and destinations, but wasnt sure about line numbers. If so, I would need to write a program that would jump to a line number and highlight it.

adobe - Is it possible to goto a line number in a pdf

I just want to output current and I wrote `import java.util.*;` at beginning, and `System.out.println(new Date());` in the main part. But what I got was something like this: `Date@124bbbf` When I

What's the difference between `import java.util.*;` and

I have a pdf document with many form fields on it. I need to see the names of the form fields. Can I do this with Adobe Reader? Perhaps a third party tool..?
