Digital Signal Processing: Pearson New International

Hello Krishna, I am pretty new to DSP but i will like a heads up on how to model chromatic dispersion in MATLAB and maybe how to simulate QPSK as well.Thank you.

Symbol Error Rate (SER) for 4-PAM - dspLog

Baseband is a signal that has a very narrow and near-zero frequency range, i.e. a spectral magnitude that is nonzero only for frequencies in the vicinity of the origin (termed $f = 0$) and negligible elsewhere. In telecommunications and signal processing, baseband signals are transmitted without modulation, that is, without any shift in the range of frequencies of the signal.

Baseband - Wikipedia

@Philips: I do not know much about the channel model for power line communications (except that the channel is a wire, ofcourse). However, for OFDM aspect may I point to couple of articles which I have written in the past.

Symbol Error Rate (SER) for 16-QAM - dspLog
