Geology (from the Ancient Greek $\gamma\acute{\alpha}\iota\alpha$, $\gamma\acute{\alpha}$ ("earth") and $-\logia$ ("study of", "discourse")) is an earth science concerned with the solid Earth, the rocks of which it is composed, and the processes by which they change over time. Geology can also refer to the study of the solid features of any terrestrial planet or natural satellite such as Mars or the Moon.

Geology - Wikipedia

Mineral deposits can be classified as: Mineral resources that are potentially valuable, and for which reasonable prospects exist for eventual economic extraction.; Mineral reserves or Ore reserves that are valuable and legally and economically and technically feasible to extract; In common mining terminology [weasel words], an "ore deposit" by definition must have an 'ore reserve', and may or ...

Mineral resource classification - Wikipedia

The evacuation zones on these maps were developed by the Oregon Department of Geology and Mineral Industries in consultation with local officials. Evacuation routes were developed by local officials and reviewed by the Oregon Department of Emergency Management. Note that the tsunami inundation limits shown on these maps represent the worst case scenario for the two types of tsunami shown.
