Classical electromagnetism or classical electrodynamics is a branch of theoretical physics that studies the interactions between electric charges and currents using an extension of the classical Newtonian model. The theory provides an excellent description of electromagnetic phenomena whenever the relevant length scales and field strengths are large enough that quantum mechanical effects are ...

Electromagnetism is a branch of physics involving the study of the electromagnetic force, a type of physical interaction that occurs between electrically charged particles. The electromagnetic force usually exhibits electromagnetic fields such as electric fields, magnetic fields, and light, and is one of the four fundamental interactions (commonly called forces) in nature.

En physique, le vecteur de Poynting, noté \hat{s} , \hat{s} ou \hat{s} indique, dans un milieu isotrope, la direction de propagation d'une onde électromagnétique. Le flux du vecteur de Poynting à travers une surface (fermée ou non) est égal à la puissance véhiculée par l'onde à travers cette surface.. Le module de ce vecteur est donc une puissance par unité de surface, c'est-à-dire un flux ...
