American Academy of Orthopaedic Surgeons - AAOS

x Ankle sprains are amongst the most common injuries presenting to emergency departments in the UK. They are not one single entity but a heterogeneous group of injuries with a wide spectrum of severity. Most injuries will involve the lateral ankle ligament complex but it is important to ensure injuries to the syndesmotic ligaments or the deltoid ligaments are not missed.

Poliomyelitis, often called polio or infantile paralysis, is an infectious disease caused by the poliovirus. In about 0.5 percent of cases there is muscle weakness resulting in an inability to move. This can occur over a few hours to a few days. The weakness most often involves the legs but may less commonly involve the muscles of the head, neck and diaphragm.
